

Quiz #16

Download 'vel_Exam2.txt' from the website before beginning.

Write a script that will allow the user to create a customized plot of time vs. position. The user should be able to input the color of the plot line. In addition, the title of the plot should be customized to include information about the time range of the data as well as the max displacement. Test your script by loading the data from 'vel_Exam2.txt' and plotting that data. Data is in the following order: time, position. You should get a plot similar to the one below.
