

Quiz #22

1. Given the equation below do the following:

$$T = \frac{ax}{1 + bxy}$$

- a) Create a symbolic equation for T
- b) Create a variable 'num' that contains the symbolic expression for the numerator
- c) Create a variable 'den' that contains the symbolic expression for the denominator
- d) Substitute a =2, x=6 into the numerator
- e) Substitute b=3, x=6 into the denominator
- f) Create an updated expression of T that uses the results of steps 4 and 5
